

Laser-Disc Music Video Door (Drink Machine Door)
Claims

What I claim as my invention is: Something that will enter the Soda-Machine into the Entertainment World. Other existing Drink Machine illuminated facades will surely step aside to customer entertainment; Live News Events, Pre-recorded Music Videos, Live auditions for T.V. Commercials. All possible by a purchase of a soda.

I claim these features combined with my design on
The Laser-disc Music Video Drink Machine Door,
Door designed with;

- 1) Video Screen 2) Speakers for Stereo-sound
- 3) Satellite receiver antenna 4) Cameras
- 5) Video Record-Playback 6) Cassette gift-dispenser
- 7) Motion Detectors 8) Multi-Selection Panels
- 9) Digital Counters

I James A. Satchell Jr., claim this combination Entertainment package design as a replacement door for existing soda machines. On this day 6/1/95.
